

2013 Report of the UPSTART Program

Background

Waterford Research Institute, a nonprofit founded in 1976 with a mission to use technology to help provide educational equity and excellence for all children, was selected to administer the UPSTART Program in March 2009.

As planned and administered by Waterford, UPSTART (Utah Preparing Students Today for A Rewarding Tomorrow) is a unique response to the need for preschool training in Utah, providing the state's youngest students with access in their homes to outstanding instruction in reading, math, and science. The overarching goal of the UPSTART Program is to provide truly individualized instruction, serving children with the greatest needs, while, at the same time, challenging gifted children to reach their full potential.

UPSTART is comprised of three software programs:

- *Rusty and Rosy Learn with Me™* (RRLWM) delivers individualized instruction in reading, math, and science that adapts to each child's learning trajectory. The program includes: 360 digital books; 330 animated songs; more than 7,000 total activities; 2,500 lessons; and 450 instructional hours that meet national, state, and professional standards and guidelines.
- The *Waterford Assessments of Core Skills™* is a fundamental testing breakthrough for assessing very young children who do not know how to read. It is computer adaptive, offers immediate scoring and reports, and is completed in one to two brief sessions.
- *Camp Consonant™* offers additional help with reading. Set in a fun camp setting, it features 3,700 unique activities, including songs, games, reading passages, and a built-in motivational system. It provides more than 150 hours of instruction and features a brain-research-based, multi-sensory approach.

The UPSTART Program recognizes the home and parents and caregivers as key educational resources. The home provides the benefit that education can take place seven days a week without the need to travel for access to instruction. Parents and caregivers can provide the motivation for children to ensure that they spend the necessary time on program materials. To capitalize on these key resources, UPSTART provides a special support organization for participating children and their parents or caregivers. Unlike a typical support structure which is passive in relation to users except when there are problems and questions to be solved, the UPSTART support team maintains frequent contact through written materials, in-person and online training, emails, and telephone calls. The strategy is to provide a steady stream of data on children's usage, performance, and needs, as well as to introduce motivational strategies for maintaining their interest.

Year 4

In Year 4, a total of 1,225 families participated with 1,250 UPSTART children. Unfortunately, 538 families were wait-listed for the program and, in the end, could not be served. Another 230 families applied for the program after the wait list was closed. All of those families were given the opportunity to purchase the program, pursuant to the UPSTART enabling legislation.

Of participating families, 380 families received computers, Internet, or both. The following tables give demographic information for the overall program and for the families in the program receiving equipment.

UPSTART Year 4 Cohort Demographics

Year 4 Results: Usage

Usage is the key to success for the UPSTART Program. When parents/caregivers enroll children in the program, they commit to 15 minutes of use on the reading program, five days a week, for a total of 75 minutes each week.

The average weekly reading usage for Year 4 was 107 minutes, and the total average for the year was 4,601 minutes.

The following table shows several demographic views of usage:

Ethnicity	Average Weekly Minutes
African-American	91.9
Asian	104.6
Caucasian	107.0
Hispanic	107.8
Native American/Alaskan Native	95.2
Other	123.9

Year 4 Results: WACS Assessment Data

Waterford uses the *Waterford Assessments of Core Skills™* (WACS) to assess children in the UPSTART Program. WACS is a computerized adaptive test of early literacy for students in pre-kindergarten through 2nd grade. Initial content validity for WACS was established against state and national standards for 11 subtests:

- letter recognition
- letter sound
- initial sound recognition
- blending
- segmenting (an advanced skill not included in the UPSTART WACS test)
- reading real words
- reading nonsense words
- sight words
- reading comprehension
- listening comprehension
- vocabulary

All items were calibrated for item response theory to determine item difficulty. To establish concurrent validity and predictive validity student performance on WACS was compared to performance on five commonly-used standardized tests also measuring early reading skills [DIBELS, Texas Primary Reading Indicator (TPRI), Idaho Reading Indicator (IRI); Iowa Tests of Basic Skills (ITBS), and Stanford Achievement Test Series (SAT 10)]. All correlations between tests are highly significant. Additional analyses indicate that WACS is internally coherent and has strong test-retest reliability.

WACS is an adaptive test. Pre-kindergarten students such as those in the UPSTART Program, only see the basic skills unless they perform well, in which case they also see advanced skills. When students take WACS for the first time, most of them receive basic skills only. As students use RRLWM and advance in their reading abilities, they perform better at the end of the program when taking WACS, and are able to successfully complete basic as well as advanced skills. Therefore, the number of students receiving advanced skills increases from the beginning of the program to the end of the program. Additionally, as more students complete reading comprehension successfully at the end of the program, fewer students complete listening comprehension at that time.

The following is the question difficulty ranges for WACS by grade. Note each grade is divided into thirds, for example, kindergarten beginning, kindergarten intermediate, and kindergarten advanced.

Grade	Beginning	Intermediate	Advanced
Preschool	1001 - 1333	1334 - 1666	1667 - 2000
K	2001 - 2333	2334 - 2666	2667 - 3000
1	3001 - 3333	3334 - 3666	3667 - 4000
2	4001 - 4333	4334 - 4666	4667 - 5000
3	5001 - 5333	5334 - 5666	5667 - 6000
4	6001 - 6333	6334 - 6666	6667 - 7000

Year 4 pre- and post-test scores for the ten subtests used in UPSTART are shown in the following graph.

The following table gives both the numerical score and a grade-level equivalent to indicate participants' end-of-program performance.

Measured Individual Skill	Final WACS Score	Grade Equivalent
Letter Recognition	2082	K Beginning*
Letter Sound	2715	K Advanced
Initial Sound	2618	K Intermediate
Blending	2847	K Advanced
Listening Comprehension	2759	K Advanced
Non Words	3597	1 st Intermediate
Sight Words	3240	1 st Beginning
Real Words	3453	1 st Intermediate
Reading Comprehension	3019	1 st Beginning
Vocabulary	2883	K Advanced
*Kindergarten Beginning is the ceiling for Letter Recognition		

The following graphs show WACS gains by ethnicity, SES, household income, and preschool attendance.

(Note: Due to low N—participant count for this category—some ethnicities are not represented in the above graph.)

WACS Reading Score Gains Grouped by Household Income

WACS Reading Score Gains Grouped by Other Preschool Attendance

Math, Science, and Reading Intervention

By design and direction from the UPSTART Advisory Committee, UPSTART focuses first on reading, as described above in the usage and assessment data sections. However, UPSTART participants also have access to RRLWM's math and science curriculum. Year 4 participating children using math and science averaged 1,497 minutes on math and science. The math and science minutes are *in addition* to the usage minutes reported above for reading. Science and math are not assessed as part of the UPSTART program.

UPSTART also includes the multi-sensory intervention program *Camp Consonant*[™]. During Year 4, 140 UPSTART children used the program at some time during the year. Based on usage and progress in the core curriculum, Waterford staff members consulted individually with parents or caregivers to discuss their observations of their child's learning styles and needs. Waterford staff members then described the multi-sensory approach used in *Camp Consonant*[™] and gave parents and caregivers the choice to move the children to *Camp Consonant*[™] or continue in RRLWM, the UPSTART core curriculum.

“Graduations”

During the past year, Waterford hosted 66 Year 4 “graduations” (which included final testing for Year 4 participants) in the following communities: Blanding, Cedar City, Layton, Midway, Logan, Ogden, Orem, Salt Lake City, St. George, Tooele, Vernal, Brigham City, Manti, and Price.

Waterford would like to thank the legislators who attended those sessions to meet the children and discuss the program with parents and caregivers.

Survey of Participating Parents and Caregivers

Waterford surveyed parents and caregivers at the end of Year 4, and responses are detailed below.

Overall, do you feel participating in UPSTART was beneficial?

		Response Percent	Response Count
Yes		99.8%	968
No		0.2%	2

Please explain: 760

answered question	970
skipped question	2

Do you feel UPSTART helped prepare your child for kindergarten?

		Response Percent	Response Count
Yes		99.3%	954

Do you feel the usage requirements are too strict?			
		Response Percent	Response Count
Yes		15.0%	137
No		86.0%	784
answered question			912
skipped question			60

Was the purpose of consistent usage explained to you?			
		Response Percent	Response Count
Yes		98.0%	894
No		2.0%	18
answered question			912
skipped question			60

Which of the following motivational tools enhanced your experience with the program? Check the appropriate boxes below:					
	Very helpful	Somewhat helpful	Not helpful	Didn't know about it	Rating Count
Kids Corner	26.1% (210)	33.2% (267)	14.8% (119)	26.1% (210)	805
Vocabulary word of the week	33.1% (284)	40.4% (347)	20.3% (174)	6.2% (53)	858
Weekly usage e-mail	79.2% (712)	16.0% (144)	3.7% (33)	1.7% (15)	899
Achievement chart	68.1% (605)	21.6% (192)	5.7% (51)	4.6% (41)	889
Contests and incentives	37.8% (331)	33.6% (294)	23.7% (207)	5.0% (44)	875
Conversations with user support representatives	58.2% (513)	32.0% (282)	6.3% (56)	3.5% (31)	882
answered question					924
skipped question					48

Are you likely or unlikely to enroll another child in the program?			
		Response Percent	Response Count
Likely		82.2%	732
Unlikely		18.5%	165
Please explain:			638
answered question			891
skipped question			81

Cost

The cost-per-participant for UPSTART Year 4 was \$1,305. That number includes providing computers and Internet connectivity to qualifying families in the program without equipment and access.

At the end of Year 4, equipment inventory indicated that all but 43 participants had returned their equipment (computers and drives), for a loss rate of 3.4% (Note, Waterford will be making a final effort to secure unreturned equipment in mid-September.).

Year 5

On behalf of the UPSTART Program and the children it serves, Waterford would like to thank the Legislature for the additional funding the program received during the 2013 session. Additional funds were targeted to serving children from Spanish-speaking homes, children from low-income homes, and children from rural school districts. This emphasis is in keeping with the UPSTART Advisory Committee's and Waterford's dedication to reaching as many at-risk and underserved children as possible with the UPSTART Program.

Year 5 Outreach Activities

To that end, preparing for Year 5, Waterford was involved in the following outreach activities to advise parents and caregivers of the availability of UPSTART.

Government Agencies and Nonprofits

Heath Departments of South Eastern Utah: Price, Moab, Blanding, Monticello (in-person meeting)

Children's Justice Center of Price (in-person visit)

Centro Hispano of Utah County (in-person visit)

Latinos in Action (in-person visits)

Centro de la Familia de Utah Honeyville, Genola, Centerfield, Providence, (in-person visits)

Mountainland Head Start (in-person visit)

Bear River Head Start (telephone and email)

SUU Head Start (in-person presentation)
Richfield Head Start (in-person visit)
Panguitch Head Start (in-person visit)
Kanab Head Start (in-person visit)
Delta Early Childhood Center (in-person visit)
UVU Weecare Program (telephone and email)
Housing Authority of Price (in-person visit)
United Way of Eastern Utah (in-person visit)
Hser Ner Moo Refugee Community Center (in-person visit)
Sunnyvale Refugee Community Center (in-person visit)
Castle Valley Center Price (in-person visit)
Comunidades Unidas (telephone and email)
Centro Civico Mexicano (telephone and email)
YCC of Ogden (telephone and email)

Public Libraries (in-person visits)

Beaver City Library
Castle Dale Library
Delta City Library
Huntington City Library
Minersville Library
Orangeville Library
Price City Library
Provo City Library
Springdale Library

Religious Organizations

St. Peter and Paul Catholic Church West Valley (in-person)
St. Mary Catholic Church Park City (telephone and email)
St. Joseph Catholic Church Ogden (in-person)
Catholic Diocese of Utah (in-person)

Mexican Grocery Stores (staffed information tables)

Acapulco Market
Campos Market
La Diana
Rancho Market
Viva Markets

Elementary Schools by District (in-person visits)

Notable results from those outreach activities include:

- Lower-SES participation in Year 5 will top 70% for the first time compared to 63% in Year 4.
- Hispanic/Latino participation is currently at 21% compared to 19% in 2014 (both numbers compare favorably to the Utah State Office of Education’s enrollment demographics which show 15.5% for the state).
- Participation in rural districts is up 52% (Note: The Utah Foundation identifies “rural” districts as Beaver, Daggett, Duchesne, Emery, Garfield, Grand, Kane, Millard, North Summit, North Sanpete, Piute, Rich, San Juan, Sevier, South Sanpete, South Summit, Tintic, and Wayne) with increases in Beaver District from one to 13 participants; 10 to 20 in Duchesne; 3 to 21 in Millard; 7 to 16 in South Summit; and 1 to 13 in Tintic. Carbon and Uintah (classified as “rural” by Western Institute for Research and Evaluation) increased from 2 to 20 and 31 to 49 respectively.

Year 5 of the UPSTART Program is currently underway. To date, 85 training sessions have been presented in the following communities: **Cedar City, Layton, Logan, Ogden, Orem, Eureka, Salt Lake City, Midway, St. George**, Vernal, **Brigham City**, Manti, Price, **Delta**, Blanding, and Tooele. Those locations in boldface type included Spanish-language trainings as well as English. Four to five additional training sessions are planned in September/early October.

The Year 5 participation goal is 1,506 sponsored by the State of Utah. Several community sponsors have also stepped up to support an additional 38 to help Waterford achieve the goal of serving all of the lower-SES families who applied for the program before pre-registration was closed on May 2.

Unfortunately, UPSTART was unable to serve 553 homes that were wait-listed, and another 248 pre-registrations were received after the program was closed.

UPSTART Advisory Committee

The UPSTART Program continues to benefit greatly from its outstanding Advisory Committee. The committee meets quarterly to receive information about the program and make recommendations. Note the inclusion of two new members: Chuck Foster, American Indian Education Specialist, Utah State Office of Education; and Gonzalo Palza, CEO and Head Start Director, Centro de la Familia de Utah. Both bring important and improved access for UPSTART to at-risk children throughout the state.

- Chuck Foster, American Indian Education Specialist, ESEA/Federal Programs, Utah State Office of Education
- Brenda Hales, Deputy Superintendent, Instructional Services, Utah State Office of Education
- Tiffany Hall, Coordinator, English Language Arts, Utah State Office of Education
- Christine Kearl, Education Director for Governor Gary Herbert's Office
- Nancy Livingston, Literacy Specialist and Emeritus Professor, Brigham Young University School of Education
- Joanne Milner, Education Partnership Coordinator for Salt Lake City Mayor Ralph Becker's Office
- Lynette Mitchell, Retired Executive Director, Rural Utah Child Development Head Start
- Gonzalo Palza, CEO and Head Start Director, Centro de la Familia de Utah
- Kathleen Petersen, Title I Director, Washington County School District
- Dale Smith, Associate Dean of Education, Social Work, and Family and Human Studies, Salt Lake Community College
- Cheryl Wright, Associate Professor, Department of Family and Consumer Studies, University of Utah
- Claudia Miner, UPSTART Program Executive Director, Waterford Institute
- Dustin Heuston, ex officio, Chairman, Waterford Institute

UPSTART Program External Evaluation

Through an RFP process during the first year of the UPSTART Program, USOE selected the Evaluation and Training Institute (Los Angeles, CA) to conduct the multi-year external evaluation of the UPSTART Program. Waterford received the Year 3 external evaluation of the

UPSTART program in March 2013. It is appended in its entirety to this report. The following is an executive summary of the Year 3 ETI report.

- The evaluation of UPSTART's third year of implementation used a pretest-posttest control group design to assess the program's impact on developing children's early literacy skills in preschool. Other objectives included documenting the extent to which participants used the computerized curriculum; establishing the relationship between curriculum usage and literacy outcomes; and the degree to which the participants met the program's curriculum usage criteria.
- Three hundred and five children were measured on two tests of early literacy skills: the Brigance Inventory of Early Development and the Bader Reading and Language Assessment. Differences in the development of literacy skills between a sample of UPSTART participants (the treatment group) and a group of similar nonparticipants (the control group) in the year prior to enrollment in kindergarten were examined.
- **Brigance Growth Score Results**
Growth rates were significantly different between the treatment and control group for the overall Brigance and five subtests. All of these differences in growth rates favored the UPSTART Treatment group. On average, the UPSTART participants scored 28 points higher on the Brigance posttest. The study reported an effect size estimated to be .68 for Total Brigance. Figure 1 below uses bar charts to compare the growth rates of the UPSTART treatment and control group as measured by the Total Brigance and each of its subtests from pretest to posttest for the matched samples.
- **Bader Growth Score Results**
The UPSTART group showed significantly stronger growth rates relative to the control group on the Total Bader and all of the Bader subtests as well. Figure 2 below uses bar charts to compare the growth rates of the treatment and control group as measured by the Total Bader and each of its subtests from pretest to posttest for the matched samples. The study reported a .85 effect size and noted, "the UPSTART impact as measured by the Bader was substantial, not only in size but in breadth, as the gains in phonological awareness were observed for UPSTART participants across the board for all three subtests as well as for the Total Bader."
- **Notable Overall Findings**
Compared to previous years, the Year 3 participants logged a greater number of instructional hours with the UPSTART curriculum.

Length of participation in the UPSTART curriculum was significantly and positively correlated with literacy skills at the beginning of kindergarten.

The UPSTART graduation rate has continued to rise each year to 94% in Year 3. This indicates that UPSTART is making very good progress in achieving the curriculum usage goals set for program implementation.

Evidence from year 3 results suggests that UPSTART's use of education technology in a home based approach has considerable merit for facilitating the development of school readiness in young preschool children.
